Andriy Matviiv

Junior Java Developer

Summary

I'm fast learning, self-motivated person who wants to start career in IT industry as an engineer and get involved in innovating projects. I'm always glad to work in a team, learn something new and constantly go to my goal.

I have some basic development skills which I believe will help me to efficiently cooperate with developers while working on investigation and resolving different issues. I'm well organized and tolerant, result-oriented person. I'm opened for learning new technologies and practices.

My previous experience was related to power engineering. My responsibility was ensuring uninterrupted electricity supply of industrial facilities and domestic consumers, installation and repair of electric networks.

I was cooperating with a lot of people while working on different kinds of tasks, resolving conflicts etc. Such experience improved my skills of cooperation.

I'll always try to do my work well.

Skills

Programming languages /Technologies/Frameworks (basic level):
• Java (Spring, Hibernate, JDBC, JPA)
• JavaScript
• TypeScript (Angular, Ionic)
• HTML/CSS
• MySQL
• C#/.NET
• Visual Basic For Applications

Development Tools:
• IntelliJ IDEA
• Visual Studio IDE

Other Software:
• Microsoft Office
• Photoshop
• Corel Draw

Operating Systems:
• Microsoft Windows XP/7/8/10

Employment history

2018-07 - present	**Electrical Engineer** Lvivoblenergo, PrJSC (power delivery) **Responsibilities:** • Electrical power circuit design • Technical reporting
